### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 rejected under 35 U.S.C. 102(e) as being anticipated by Renault, Sato et al., either US 6,428,065 or 6,676,179, Iwatoto et al., or Fuji.

The crushing ratio predetermined value is an inherent function of the different crush materials at top and bottom.

3. Claim 4 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by either Renault or Sato et al., either reference.
4. Claim 5 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by either Iwamoto et al., or Renault.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3612

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 2, 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Renault, Sato et al., either reference, Iwatoto et al., or Fuji.

In would have been obvious to one of ordinary skill, given the respective teachings of different crush characteristics of the upper and lower shock absorbers, to determine the crushing ratio within the band claimed as an obvious expedient to minimize knee loading in conjunction with statutory requirements.

As to claims 6-7, these are the approximate dimensions of knee to mid range of a lower leg and knee height from ground, respectively.

8. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Renault.

The determination of the exact size of the upper and lower absorber, given Renault's drawing disclosure of the upper being much larger than the lower, is deemed to be an obvious expedient to one of ordinary skill in the art in order to conform to statutory requirements regarding knee loading.

9. The information disclosure statement filed 7/24/2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that

portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the foreign copy referred to therein has not been considered as no copy has been provided, as confirmed by the transmittal document of 7/24/2003.
